## PHARMACISTS OATH

*I Swear by the code of Ethics of Pharmacy Council of India in relation to the community and shall act as an integral part of health care team.*

*I shall uphold the laws and standards governing my profession.*

*I shall strive to perfect and enlarge my knowledge to contribute to the advancement of pharmacy and public health.*

*I shall follow the system, which I consider best for pharmaceutical care and counselling of patients.*

*I shall endeavour to discover and manufacture drugs of quality to alleviate sufferings of humanity.*

*I shall hold in confidence the knowledge gained about the patients in connection with professional practice and never divulge unless compelled to do so by the law.*

*I shall associate with organizations having their objectives for betterment of the profession of Pharmacy and make contribution to carry out the work of those organisations.*

*While I continue to keep this Oath inviolated, may it be granted to me to enjoy life and the practice of pharmacy respected by all, at all times!*

*Should I trespass and violate this oath, may the reverse be my lot!*

Lalhmingliana  
General Secretary  
General Headquarters, Aizawl

## HOSPITAL PHARMACY PRACTICE

**P**harmacy kan tih hian damdawi siamchhuah a nih aṅanga a enkawl te, natna enkawlna atana hman te, damloa a thawh dan vil zui te leh a nih tur ang taka hman a nih leh nih loh enzui te hi a huam vek kan ti thei ang. Hospital pharmacy leh pharmacy practice kan tih hian heng hna hrang hrangte hi a keng tel vek a ni. Chuvangin, he hna enkawltu (Pharmacist)-te hi kan pawimawh em em a, mipuite hriselna hi pharmacist-te chungah thui tak a innghat a ni. Tichuan, Hospital Pharmacy chu eng nge a nih chiah a, Pharmacist-ten chutah chuan eng nge kan pawimawhna chiah, tih kan thlirho ang.

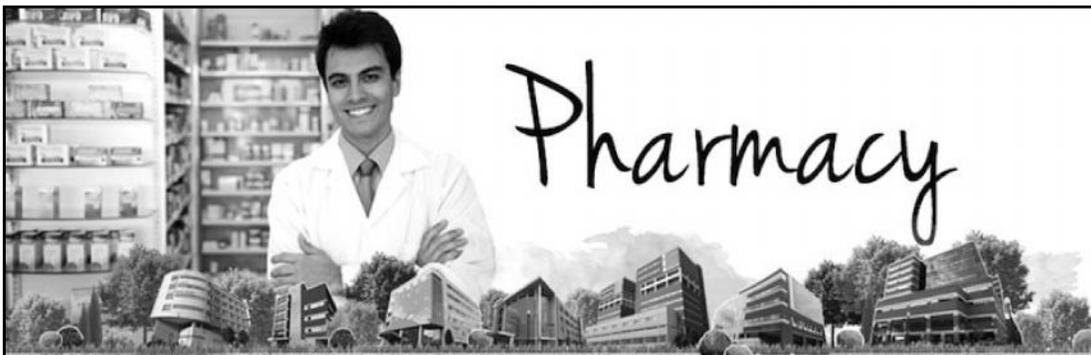

### Hospital pharmacy hi eng nge ni?

Hospital pharmacy hi damdawi-ina department pakhat, damdawi chungchanga thiamna nei leh tlingten damdawi an enkawl a ni mai awm e. 'Damdawi enkawl' tih hian a lei (procurement) te, mamawh anga siam (manufacture) te, a ṅul dan anga semchhuah (distribution) te leh damlote hnena a hmanna tur dik taka hman a nih theih nana pek (dispensing) te a

huam a ni. Hei hian a tum ber chu damlote dam nan, damdawi chu a nihna tak leh ṅangkaina taka hman a nih theih nan a ni. Hei hi 'Pharmaceutical care' tiin a sawi theih bawk.

'Pharmaceutical care' kan tih hi thil chi thum inkawp a ni a, chungte chu:

1. Hospital chhunga hnathawk dangte nen damlo enkawlna kawnga thawhhona ṅha zawk neih.

2. Damdawi ÷ha leh ÷ha lo enfiah a, damlo tana damdawi ÷ha leh hmantlak ngei pek.

3. Damdawi hman dan dik leh fim-khur a ngaihna chungchanga damlo zirtirna pek.

**Pharmacist mawhphurhnate:**

Hospital-a pharmacist mawhphurhnate han tarlang ila:

1) Pharmaceutical care a nihna tur ang taka kalpui.

2) Hospital pharmacy hnathawh hmasawna ngaihtuah.

3) Pharmacy staff-te damdawi en-kawlna chungchanga hma an sawn zel theih nana zirtirna pek leh fuih an ngaih huna fuih te.

4) Hospital-a hnathawktu dangte nena thawhhona ÷ha neih.

5) Pharmacy a hmanraw mamawh leh ÷ulte (damdawi ni lo) lei leh hralh chungchangah ruahmanna fel tak siama kalpui.

6) Damlo enkawlna kawnga hmasawna leh hlawhtling zawka kalpui a nih theih nana doctor leh hospital hnathawktu dangte thawhpui.

7) Pharmacy chungchanga inrel-bawlina (administration) te, damdawi lei leh pekchhuah chungchangah te record fel taka vawn ÷hat.

8) Hospital-a department dangte nena thawhhona ÷ha neih theih dan tur ngaihtuah.

**Pharmacy Practice:**

Pharmacy practice-in a tum ber chu ram leh mipuite tana a ÷ha thei ang ber

tura natna enkawl nana damdawi leh a kaihhnawih thil te enkawla pek kan ti thei ang. Hei hian mipuite chu hriselna ÷ha zawk nei a, an natna lak ata chhanhimna kawnga puih a, hriselna ÷ha nei tura hnathawh a ni. Tin, hriselna kawngah Pharmacist-ten hriselna kawnga thawktu dang (healthcare professionals) te nen thawhhona ÷ha tak an nei tur a ni bawk.

Pharmacy practice hlawhtling taka kalpui nana thil pawimawh deuh deuh te chu:

- *Purchasing (damdawi lei chungchang)*
- *Inventory control*
- *Storage*
- *Dispensing and distribution (a sem chhuah/pek chhuah)*
- *Drug information and patient counselling*

**Damdawi lei chungchang (Purchasing)**

Damdawi lei dawna thil hriat ngai leh tihur ÷ul hmasate:

- ▶ Damdawi hming, damdawi siamtu company hming leh address
- ▶ Damdawi chungchang kimchang zawka tarlan e.g: a chak zawng (strength, damdawi chi khat nge damdawi dang nena chawhpawlh (single or combination drugs)
- ▶ Damdawi leina tura dilna thehluh
- ▶ Damdawi receipt mumal taka siamtir leh vawn ÷hat
- ▶ Damdawi/Bungrua lei kir let leh (return) a awm chuan chiang taka record leh receipt siam

Damdawi leh a kaihnawih damlo enkawlina atana hmante hi a lei dan kawng thum a awm a, chungte chu:

- 1) A siamtu company emaw wholesaler hnen aṅanga lei (direct purchase)
- 2) A lei thei tur zawna (tender) chhuah a, chuta a lei tur thlante aṅanga lak chhawn.
- 3) Hmanhmawh thila veng chhung/ram chhunga retail dawr aṅanga lei

**Inventory Control:**

Hei hian a tum ber chu damdawi/bungraw leiho chu endik a, a nih tur ang tak leh a hlutna (entirnan, a man zat a inmil em, orderna lehkha nen a inmil em, etc.) dik taka lei a ni em tih zirchianna a ni. Inventory hi heng a hnuai mi hoah hian a innghat thei:

- ▶ Bungaw leina hlat zawng (distance) azirin
- ▶ A vawn ṭhat dan azirin.
- ▶ Lei aṅanga dawn (receive) hun chhung azirin
- ▶ Inhlanchhawn (transport facilities) dan azirin

**Inventory control ṭangkaina leh hnathawhte:**

- i) Kan bungrua/damdawi inang reng man tlawm zawka lei te, mamawh zat dik tak lei te leh a hun bi dik taka lei
- ii) Bungrua hman loha dahṭhat (stock) tihtlem leh pawisa fai (cash)-a bungraw lei tihtlem
- iii) Sum leh pai dinhmun, lei leh hralh te leh inhlanchhawn (transport) hun dik tak hre thei tura thlirlawk (forecast)

iv) Ziaka thil engkim felfai taka vawn (records).

**Inventory control theih dan kawng hrang hrangte:**

- i) ABC Method
- ii) VED Analysis
- iii) Lead Time
- iv) Inventory Carrying Cost
- v) Safety Stock
- vi) Minimum Stock Level
- vii) Maximum Stock Level
- viii) Economic Ordering Quantity
- ix) Reorder Level

**i) ABC Method (Always Better Control):** Hemi method-ah hian damdawi chu hlawm thumah ṭhen a ni a, hetiangin-

Class A : Damdawi to (costly) ho  
 Class B : Damdawi to lutuk lo (medium) ho  
 Class C : Damdawi tlawm (cheap) ho

**Class A:** Items 10-20% hi he mi chhungah hian a awm tlangpui a, chu chu 70-80% sum hmanral a huam thei a ni. Heng items ho hi stock tam reng ngai leh pek chhuah hnem tak an ni.

**Class B:** Items 10-20% a ni thei, mahse sum hmanral (expenditure) hi 15-20% a ni thung.

**Class C:** Items 60-80% a ni thei, sum hmanral (expenditure) hi 5-10% a ni thung. Items pek chhuah tam an nih loh avangin stock tam lutuk an ngai lo.

Group	% of Items	% of Costs
A	8	75
B	25	20
C	67	5

**ii) VED:** VED tih chu Vital Essential Desirable tihna a ni a. Hetah hian damdawi/bungrua chu hmanna leh mamawh an nih dan anga then hran an ni.

*Vital:* Bungraw mamawh leh tul zual bik, a tel loa hnathawh chhonzawm theih loh emaw, hun eng emaw chen hnathawh tikhaihlak thei ho sawina a ni. A man a to avang hian lei nan hun rei mamawh thin a ni. Damdawi mamawh leh engtik lai pawha neih reng ngai ho tiin kan sawi thei mai awm e. Entirnan, Crocin, Dolo-650, Pacimol, etc.

*Essentials:* Hei pawh hi damdawi/bungraw mamawh reng a ni. Amaherawhchu, Vitals ho aiin an pawimawh dan a nep deuh thung. Man tlawm zawk leh hmuh mai theih a nih avangin a leiah harsatna a awm lem lo bawk. Entirnan, Calpol, Medomol, etc.

*Desireable:* Mamawh tho ni mah se, a awm loh pawha thil danga thlak (substitute) mai theih a ni. A awm loh pawha harsatna thlen lo tura ngaih an ni. Entirnan, Lanol, Dolopar, etc.

**iii) Lead Time:** Hei hi bungrua/damdawi lei tura order pek atanga a leitu kuta a thlen nana hun a duh rei zawng sawina a ni.

**iv) Inventory carrying cost:** Hei hian dahthatna man (storage cost) te, insurance leh tax te, hnathawktu hlawh te leh chhan hrang hrang avanga hloh (waste) te a huam a ni.

**v) Safety stock:** Damdawi/Bungrua chu mamawh huna hman mai tur a awm theih nan hman lai mek bakah dahthat chin neih ngei ngei tur a ni a. Hei hian bungrua/damdawi chatlaka awm mai tur a veng thei a ni. Chu chu safety stock tih a ni.

**vi) Minimum stock level:** Bungrua chu kar khat chhunga hmanral zat atang te, a thar lei nana hun a duh rei chhung azir te leh a thar lei ngun dan (reorder) azir te, a stock awm zat tlem thei ber tur bithliah a ni.

Minimum stock level=reorder level- (normal consumption per week × average time taken to receive fresh supply).

**vii) Maximum stock level:** Bungraw stock tam lam neih theih zat tur bithliah sawina. A bungraw nihphung azirte bakah hman ral dan azira siam a ni.

**viii) Re-order level:** Hei hi bungraw lei (order) leh hun tur sawina a ni. Minimum stock level a pelh hreta order hi siam leh thin tura duan a ni. Hei hian damdawi chatlak awm thei tur a veng thei a ni.

Inventory control awlsam tak leh felfai zawka kan tih theih nan hian Business Accounting Software rintlak leh tha tak hman hi a pawimawh em em a, hemi hmang hian a chungang method hrang hrang kan sawi takte hi a nihna tur dik tak leh felfai takin a kalpui theih a ni.

### **Storage**

Damdawi hi uluk taka vawnthat dan tura a siamtuten an duan ang taka enkawl a tul takzet a ni. A nih tur ang taka vawnthat a nih loh chuan a chakna (potency) a hloh theih mai bakah chemical dang hlauhawm takah a insiam thei a ni. Pharmacist chuan damdawi chu hmun vawt (cold)-a dahthat chi te, hmun dai (cool)-a dahthat chi te uluk takin a thliar hrang tur a ni. Tin, kan damdawite uluk taka then hran an nih loh chuan mamawh huna hmuh mai a harsa thin a ni. A hnuaia mi ang hian kan damdawite chu kan then hrang thei ang:

- ▶▶ A siamtu company azirin
- ▶▶ Damdawi hnathawh/hmanna azirin
- ▶▶ Brand name a alphabetical indawt danin
- ▶▶ Generic name a alphabetical indawt danin

**Dispensing and distribution  
(A semchhuah/pekchhuah):**

Pharmacist hna pawimawh ber pakhat chu damdawi pek chhuah leh sem chhuah hi kan ti thei ang. Damdawi hmanna tur dik tak leh hman dan tur dika hman a nih leh nih loh thui takin a hril thei a ni. Damdawi pek chhuah dan thenkhat han tarlang ila:

**Individual prescription order system:** Doctor-in damlo damdawi a chawhna lehkha (prescription) aṅanga damdawi pek chhuah sawina. Hei hian in-patient leh out-patient a huam vek a ni.

**Complete floor stock system:** Hei hian damdawi-ina damlo awm hna damdawi pek chhuah a kawt thung. Hetah hian damdawi hi nursing station kaltlanga sem a ni ṅhin. Chi hnihah a ṅhen theih, hetiangin:

**Charged floor stock system:** Damdawi chu nursing station-ah damlo mamawh tur hriatsa aṅanga dahkhawm a ni a, chuta ṅang chuan damlo malin a mamawh tur anga ṅhen hrana pek chhuah leh a ni. Charge tih hian damloin a man a pek tur tih a entir.

**Non-charged floor stock system:** Hospital-a nursing station ṅheuhin a mamawh, a ṅul anga damloten man chawi hran tawh lova hman theiha dahkhawm sawina a ni ber.

**Drug information and patient counseling**

Damdawi chungchang a kimchang thei ang bera hrilhfhahna tiin a sawi theih ang. Hengte hi a huam:

- ▶▶ Damdawi chu eng nge a nih?
- ▶▶ Eng atana hman tur nge a nih?
- ▶▶ A hman zat tur dik tak (dose) hrilhfhah
- ▶▶ Damdawi inhal thei (drug interaction) a awm em?
- ▶▶ Side effect awm thei hrilhhriat
- ▶▶ A vawntṅhat dan tur
- ▶▶ A ei hun bithlhah leh ei/pekna (route) tur hrilhfhah

*Healthy people are those who live in healthy homes on a healthy diet; in an environment equally fit for birth, growth work, healing, and dying... Healthy people need no bureaucratic interference to mate, give birth, share the human condition and die. – Ivan Illich*

## CEFIXIME

**Generic name:** Cefixime

**Brand name:** Suprax, Raxin, Pancef O, Alfixime, Almocef, Ofloximix, etc.

**Eng atana hman nge?**

Cefixime hi antibiotics, Cephalosporin 3rd generation class ami a ni a, damdawi dang Ornidazole (antimicrobial/antiprotozoal) nen inkawpin a awm bawk. He damdawi hi bacteria natna hrikin a thlen natna, bengkherh (otitis media), dadu (gonorrhoea), sinus hliam/vung (sinusitis), tonsil natna (tonsillitis), hrawk vung/hliam (pharyngitis), pneumonia, khawsikpui (typhoid fever), zunkawng vung/hnai (urinary tract infection) enkawlna atana hman a ni tlangpui. A damdawi hi schedule H1 zing ami niin, fimkhur leh uluk takin, doctor-in a chawh ang chauha ei tur a ni.

**Engtin nge hna a thawh?**

Cefixime hi bacteria natna hrikin a thlen natna chi hrang hrang enkawlna atan a tha hle a. He damdawi hi kan taksaah penicillin antibiotic nen an hnathawh dan a inang a. Antibiotic hmasa ber penicillin-in natna hrik an beihna proteins-ah tho a bet a, chu chuan natna thlentu bacteria lo insiam zel tur kha (Cell wall synthesis) lo dangin an than len zelna tur pawh kha a lo tiṭhuanawp ta ṭhin a, chumi hnuah chuan natna thlentu ber bacteria-te kha an lo thi ta ṭhin a ni.

**Eng angin nge kan hmuh ṭhin?**

Cefixime hi a mum (tablet), a mum ṭhial/tihsawm chi (chewable tablet), a tui inchi (oral suspension) leh laihren (capsules)-in lei tur a awm a ni.

**Engzata ei tur nge?**

Puitling tan: Cefixime dose pangngai chu 400 mg-in ni khatah wawi khat a ni a. Hei hi wawi khat a 400 mg-a eiin emaw, ni khatah wawi hnihin 200 mg-in darkar sawm pahnih danah ei tur a ni. Ni khatah hian 400 mg aia tam chu ei loh tur a ni. Natna

azirin damdawi ei hun chhung hi ni 7-14 a ni tlangpui a, damlo natna azirin a aia rei pawh a ni thei bawk.

Naupang tan: Cefixime hi naupang taksa rihna azirin pek thin tur a ni a. Thla 6 aṅanga kum 12 inkar, kg 45 aia zāng tan chuan 8 mg/kg-in ni khatah vawi khat emaw, 4 mg/kg-in ni khatah vawi hnih, darkar 12 danah pek thin tur a ni. Naupang kum 12 chin chung lam emaw, kg 45 aia rit a nih cuan 400 mg-in ni khatah vawi khat pek thin tur a ni.

Upa lamte tan: Cefixime hi upa lamte tan a ei zat tur hi puitling dose pangngai anga pek mai tur a ni a, tihdanglam kher a ngai lo.

**Side effects:**

He damdawi ei hian mi thenkhatah chuan kawṭhalo, pum na/nuam lo, lu na, thak, vual, luak chhuak, khawsik luhai, vung te a thlen thei a. Amaherawhchu heng hi a thleng ngei ngei lo a, taksa tan a pawh em em kher lo thei bawk. Chutih rual chuan tawrh hrehawm phah khawp hial pawhin a side effect hi a nasa thei a, chungah chuan a rang lama doctor-te pan vat thin tur a ni. Hmeichhe naupai lai tan chuan a ṭul dan azirin ei a him a, amaherawhchu naute hnute pe lai tan erawh chuan he damdawi hi hnute tuiah a tel theih avangin naute tan a ṭha lo thei a, ei loh theih hram chuan ei loh a him ber.

**Damdawi dang nen ei pawlh a him em?**

He damdawi hi BCG vaccine emaw, typhoid vaccine lak lai chuan ei loh tur a ni. Heng damdawi - estradiolte, probenecid-te leh warfarin nena kan ei kawp a nih chuan kan taksa tan a him tur chinah a awm em tih kan thisen lamte test-in kan vil uluk hle tur a ni.

**Kal ṭha lo leh dialysis a hman dan tur:**

Cefixime hi kal ṭha lo, CrCl 60 mL/min aia tam tan chuan a dose pangngai 400 mg-in ni khatah vawi khatin emaw, ni khata 200 mg-a vawi hnihin pek tur a ni a. Damlo kal ṭha lo CrCl 21-60 mL/min-ah chuan ni khatah 260 mg-a pek tur a ni. Damlo CrCl 20 mL/ml tan chuan a dose hi ni khatah 200 mg-in ni khatah pakhat ei thin tur a ni. Dialysis ti lai damlo tan chuan a mumin emaw, a mum ṭhial chiin ei loh tur a ni a, a tuiin 200 mg/5 ml a siam, 6.5 ml-in ni khatah vawi khatin emaw, 00 mg/5 ml-in ni khatah vawi hnih 2.6 ml-a ei thin tur a ni.

**Cefixime chungchanga hriat tur pawimawhte:**

Cefixime hi antibiotics a nih avangin doctor-in ei tur zat an tih chu natna hrik (bacteria) thai boa damdawiin a thawh tur ang tak a thawh theihna turin ei zawh ngei ngei thin tur a ni. Dam tawha inhriat avanga damdawi ei chawlhsan ringawt hian natna lo chhuah lehna chance a tisingin resistance hial a thlen theih thin avangin fimkhur a ṭul hle a, hetiang a thlen chuan kan taksaa natnate lakah hnathawh awmze nei lovin damdawi kha a awm phah thei. Pum nuam lo a thlen theih avangin pum

## ANTIBIOTICS

**D**amdawi zingah hian antibiotics tih hming hi kan hriat lar berte zing ami a ni awm e. Antibiotics hi chi hrang hrang tam tak a awm a, damdawi kan hman mekte zingah hian natna enkawlna atana țangkai ber zing ami a ni. Antibiotics chungchang hi tawite, hriat thiam awlsam thei ang turin tarlan i han tum teh ang.

Anti (kalh/do) leh biotics (thilnung) tih thu belhbawm antibiotics tih awmzia chu kan taksaa natna thlentu, nunna nei, natna hrik dotu tihna a ni a. Kan taksaa natna thlen thei natna hrik, mit lawnga hmuh theih loh, nunna nei ve si hi chi hrang hrang - bacteria, virus, fungi, amoeba, protozoa te an ni a. Hetiang natna thlen theitute hnathawh doletna atan hian damdawi țangkai tak antimicrobial agent hman țhin a ni a, antibiotic chu antimicrobial agents zing ami, bacteria avanga natna thlentu enkawlna atana hman țhin a ni.

Kum 1900 chho bawr vel, khawvel pum ang pawha damdawi thiamna a la hniam ve hle lai leh natna enkawlna lam an beih nasat em em lai khan 1928-ah British scientist, natna hrik bacteria zirbingnaa mithiam (bacteriologist) Sir Alexander Fleming chuan London damdawiin pakhata a hnathawhna (laboratory)-ah natna hrik chanchin a zir mek laiin bacteria hrik a țotirna petridish (darthlalang thleng dar tē)-ah chuan thil hmuar leh bāl a hmu tel a. A hnathawh tichhetu ngeiawm tak anga a ngaih laiin chu thil hmuar chu a han zirchian nak chuan a bul velah natna hrik, bacteria țo an lo awm reng reng lo tih a hmuchhuak ta a. Chu thil hmuar (mould) chu thil nung ve tho *Penicilium notatum* (Penicillin) a ni a, hei hian

ngaihtuahna thar pein, natna hrik dang pawh a that thei tih a hmuhchhuak ta zel a. Hun a lo kal zel a, kum 1941-ah chuan mihring natna enkawl na atana hman theih turin sawngbawl a ni a, a hunlai a natna tihbaiawm tak takte chu enkawl dam theih a lo ni ta a ni. Damdawi anga siam a nih hnuah Penicillin chu thil mak tiin 'miracle penicillin' tiin a hming an vuah hial a. Indopui 2-na a lo ni chho bawk nen, indonaa hliam sipai tam tak nunna chhantu a ni a, khawvel hmun hrang hrangah hman a niin khawvela antibiotic hmasa ber chu tun thleng hian a la hlu em em reng a, antibiotic chi thar hmuhchhuah tumin damdawi company lian ten an la bei chhunzawn ta zel a ni.

#### **ENGVANGIN NGE KAN HMAN?**

Mihringte hi kan velah hian natna hrik (bacteria)-te hian min hual vel reng a. Kan boruak hip luhah te, kan ka leh hnar, vun leh kan kawchhung, kan rilah te pawh bacteria hi an awm reng a. Kan taksa raldo khawl (immunological system) hian heng lak atang hian min veng reng thin a, mahse ven theih loh chin a neih hunah bacteria-te chuan kan taksa remchang lai apiang atangin natna min thlen ta thin a ni. Chutiang bacteria avanga natna chi hrang hrang tam tak - mitna (conjunctivitis) atanga thihna hial thlen thei pneumonia, septicemia te damdawi tha em em chu antibiotics hi a ni a. Mihring natna azirin antibiotic hman tur bik a awm hran theuh a, tin damlo pakhat antibiotics pakhat aia tam a hman a ngai fo thin baw. Antibiotics hi a tlangpuiin a eia ei chi a ni a, damlo serious deuhah chuan inchiu a ngai baw thin. Tin vuna hnawih chi te, mit leh bengal thlawr chi te pawh a awm baw.

#### **ENGTINNGE HNA A THAWH?**

A damdawi azirin antibiotics-te hian chi nhihin hna an thawk thin a, bacteria te chu thatin (bactericidal) emaw an inthlahpung zel tur titawpa taksa ral dotuin a tihchhiat mai theih tura hnathawh (bacteriostatic)-te a ni.

#### **TAKSAA A HNATHAWH**

Antibiotics-te hian natna (infection) tlanglawn hi chu ni reilote chhungin an tidam tlangpui a. Natna lanchhuah dan (symptoms) hi vawi khatah an tihreh nghal mai thin loh avangin na chhawkna ei tel a ngai fo thin a ni. A natna kha dam tawh anga a lan hnuah pawh doctor chawh ang thlapin a course kimin ei ngei ngei tur a ni a, chuti lo chuan natna (infection) awm leh theihna a sang em em a, tin antibiotic kha a hnuah taksa a natna hrik that thei tawh lo (antibiotic resistant)-in a siam thei a, a paw em em thin a ni.

Damlo na serious lem lo leh damdawi-ina awm ngai lova in lama antibiotics nena in enkawl hovah hian a hman dan tur dik taka hman chuan side effect hlauhawm hi a tam lo viau a, kawthalo leh luakchhuak te hi side effect tlangpui chu an ni mai. Amaherawhchu mi thenkhat chuan antibiotic allergy an nei thin a, hei hian paw thui tak a thlen thei thung; fimkhur viau a tha.

#### **FIMKHUR NGAIHNA TURTE**

Hospital chhunga damlo enkawl na atana hun reilote chhunga hman antibiotics ho pawh hi a tlangpuiin damlo tam zawkah chuan an him em em a. Penicillin group (Amoxicillin, Ampicillin, etc.) leh Cephalosporins (Cefaclor, Cephalexin, Cefoperazone, etc.) teah hian fimkhur a

ngai zual a. Damloteah damdawi allergy avangin thak, hrawk, hmai leh hmui vung a thlen phah thei. Hetiang a thleng a nih chuan damlo enkawltute a rang thei ang bera hrilh tur a ni a, allergy thlentu damdawi group ami ho reng reng chu hman tawh loh tur a ni. Penicillin allergy nei nasa, hre hmasa si loa hman phei chuan nikhaw hre loin a awm der theih a, allergy test neih hmasak phawt tur a ni a. Hun kal tawh lamah antibiotics allergy nei chuan doctor hnenah hrilh ngei ngei bawk tur a ni.

Antibiotics tam zawk hi kal (kidney) kaltlangin taksa ațangin a inpaih chhuak țhin a, hei vang hian kal țha lo neiah chuan fimkhur leh zual a ngai țhin bawk.

#### **ANTIBIOTICS HMAN LAR ȚHENKHATTE**

Penicillins: Amoxicillin, Ampicillin (Inclav, Sensiclav, etc.), Cloxacillin, Penicillin G, Penicillin V.

Cephalosporins: Cefixime, Cefaclor, Cefoperazone, Cephalexin.

Carbapenems: Inipenem, Meropenem.

Aminoglycosides: Amikacin, Gentamycin, Neomycin, Streptomycin.

Tetracyclines: Doxycycline, Oxytetracycline.

Macrolides: Azythromycin (Azithral, Azy 500, etc.), Erythromycin.

Lincosamides: Clindamycin, Lincomycin.

Fluoroquinolones: Ciprofloxacin (Cifran, Ciplox, etc), Norfloxacin (Norflox, Norflox OZ), Ofloxacin (Oflox, O2, etc.)

Chloramphenicol, Metronidazole (Flagyl, Metrogyl, etc.), Rifampin.

#### **ANTIBIOTIC RESISTANCE**

Antibiotic hmasa ber Penicillin hman a nih ațangin kum zabi chanve chuang lai mai antibiotics chi hrang hrangte chu mihring natna tidamna atana hmanraw țangkai ber pakhat an ni a, antibiotics hman pawh a ni t̄elin a nasa telh telh bawk a ni. Hetia natna tam zawk thlentu bacteria-te antibiotics hmanga taksa hnathawk thei loa siam a nih țhin lai hian nghawng țha lo a nei ve leh zel a, chu chu Antibiotic Resistance hi a ni. Bacteria-te hi thil nung ve bawk, mihringte anga inthlah pung thei, din khawchhuahna atana insiam danglam thei an ni a. Hei vang hian antibiotics-in tihchhiat vek tuma a beih laiin bacteria-te chuan dam khawchhuahna kawng an lo zawng ve a, anmahni lo insiam danglam (mutation) emaw, antibiotics tichhe theitu enzyme lo pechhuakin an dam khawchhuahna an lo dap ve țhin a. Hei vang hian bacteria tam tak chu antibiotics an lo hmachhawn tawh ten an tichhiat theih tawh loh, antibiotic resistant strain-ah an lo insiam țhin ta a. Chutiang antibiotic resistant bacteria ho chu inthlahpung leh bacteria dangteah inkai chhawng ve zelin antibiotics hman kha damloah hna thawk thei miah lovin a awm theih phah ta țhin a.

Antibiotic resistance awm chhan hi damloin rei tak antibiotics a hman vangte, course kim lo leh mumal lo, duhdah taka antibiotics ei țhin avangte, a hmanna tur ni loa antibiotics hman a nih țhin vang te a ni a. Chuvang chuan damdawi chawhtu doctor thiam tak takte chu an fimkhurin natna thlentu dik tak bacteria kha zawng chhuakin, chumi mil chuan antibiotics treatment an kalpui țhin a ni. Antibiotics ei reng rengin a

course kim leh doctor chawh ang thlapa ei thin tur a ni a, doctor chawh ni loin ei reng reng loh tur a ni. Hetiang thil thleng hi damlo enkawl naah pawh thui tak a neih theih avangin mithiamten an buaipui nasa a, fimkhur lo taka antibiotics-te hi hman a nih chuan kum reilote chhungin natna (bacterial infection) tam tak hi enkawl dam hleih theih loh a ni thei a, resistance avang hian tun dinhmunah pawh TB damdawi atan chuan antibiotics chi li lai ei a ngai a nih hi! Khawvel puma hriselna lam ngaihtuatu pawl lian ber WHO chuan kum 2015 November ni 16-22 kha khawvel puma antibiotics resistance chungchang inhrilhriatna hapta

**World Antibiotics Awareness Week** ah a hmang a, India ramah pawh Indian Pharmaceutical Association bultumin hemi kar vëk hi Antibiotics hman chungchang inzirtina hun atan hmangin thupuih pawh **'Responsible Use of Antibiotics Saves Lives'** tih a hmang a. ## COTRIMOXAZOLE

**Trade name:** Bactrim, Cotrimoxazole, Septra, Bactrim DS, Sulfatrim, etc.

**Generic name:** Sulfamethoxazole/  
Trimethoprim

### A hnathawh dan tlangpui:

Sulfamethoxazole hi kan taksaa natna hrik ðhang zel tur tiðuanawptu (Antibiotic) a ni. Paraaminobenzoic acid (PABA) hi chemical chi khat a ni a, natna hrik ðhanna/insiam theihna dihydrofolic acid insiamna a ni. Sulfamethoxazole hian PABA-ah hna thawkin dihydrofolic acid insiam tur a dang a, tichuan natna hrikte inthlah pung thei lovin a siam ðhin a ni. Trimethoprim pawh hi antibiotic tho a ni a, natna hrik inthlah pung zel tur vengtu ðangkai tak a ni a, dihydrofolic acid aþangin dihydrofolate reductase hmangin tetrahydrofolic acid a insiam a, dihydrofolic acid reductase-ah trimethoprim hian hna va thawkin, natna hrik inthlah pung tur a veng a ni.

### Antimicrobial Resistance:

Antibiotic resistance chungchang hi damdawi khawvelin a buaipui nasa em em a, antibiotic lar tak cotrimoxazole chungchang zirchianna tlem tarlang tel ila -

1. Sulfammethoxazole/Trimethoprim hi natna hrikte hian eng ang takin nge an huat (susceptibility/resistance) tih khawvel pum huapa zirchianna Alexander Project tia neih a ni a, chu zirchianna aþang chuan Streptococcus pneumonia bikah chuan 100 zelah 63 vel (63.3%) hian an hua a, ram 26 a zirchiannaah chuan 100-ah 90 pel an awm lo a ni. Haemophilus influenzae bikah chuan 100-ah 78.3-in an hua a, Moraxella catarrhalis bikah chuan 100-ah 72-in an hua a. Sample-te hi khäk leh thisen aþanga lak a ni a, natna hrikten an huat lohna pawh hi a inang lo a ni.

2. San Francisco General Hospital-a zirchianna an neihah chuan Cotrimoxazole hi bacteria-ten an huat lohna (resistance) hi kum 1998 atanga 1995-ah a sang a, zirchianna an neihah (Stahylococcus aureus, Citrobacter, Escherichia coli, Enterobacter, Klebsiella, Morganella, Proteus leh Serratia)-ahte hian a vaia khaikhawmin an huat lohna (resistance) hi kum 1987 thleng khan 5.5% niin 1995-ah 20.4% a kai chho a. HIV hospital bikah hian resistance hi 6.3% atangin 53%-ah a sang a ni. Cotrimoxazole resistant E.coli leh S.aureus bika neih HIV veiteah hian antibiotic dangah pawh resistance a awm tho nia hriat a ni.

**Cotrimoxazole (Sulfamethoxazole/Trimethorim) hi eng natna hrikah nge a thawh theih?**

1. Aerobic gram - positive  
Streptococcus pneumoniae
2. Aerobic gram - negative  
Escherichia coli  
Klebsiella species  
Enterobacter species  
Haemophilus influenzae  
Morganella morganii  
Proteus mirabilis  
Proteus vulgaris  
Shigella flexneri  
Shigella sonnei

Heng natna hrikahte hian a thawk a, an than a tiṭhuanawp ṭhin a ni.

**Eng atana hman nge?**

Cotrimoxazole hi kan sawi tawh ang khan natna hrikin a thlen natna tiḥdam nan hman ṭhin a ni. An hmanṭa ṭhenkhatte chu -

- ▶▶ Thâwkna lama harsatna/natna (Acute infective exacerbation of chronic obstructive pulmonary disease)
- ▶▶ Beng chung natna, bengkherh (Acute otitis media)
- ▶▶ HIV infection - Pneumocystis pneumonia
- ▶▶ Pneumocystis pneumonia, ven nan te
- ▶▶ Ríl lam natna chi khat (Shigellosis)
- ▶▶ Zinkawnga thil ei vanga kawṭhalo (Traveller's diarrhoea)
- ▶▶ Zun kawng lawng (Urinary Tract infectious disease)

**Eng angina nge kan hman ang?**

Cotrimoxazole (Sulfanethoxazole Trimethoprim) hi a mum, oral, tablet leh IV injection-in a awm a, IM-a pek loh tur a ni.

### Engzata ei tur nge?

Puitling tan:

- ✘ Thâwkna lama harsatna/natna (Acute infective exacerbation of chronic obstructive pulmonary disease)-ah hian Haemophilus influenzae emaw Streptococcus pneumonia-in a thlen a nih chuan sulfamethoxazole 800 mg/trimethoprim 160 mg darkar 12 danah ni 14 chhungin ei tur.
- ✘ HIV infection - Pneumocystis pneumonia awmah chuan chuan a natna serious dan azirin 75-100 mg sulfamethoxazole leh 15-20 mg trimethoprim IV darkar 6-8 ni 21 chhungin a dose sem rualin pek tur.
- ✘ Pneumocystis pneumonia venna hi 800 mg sulfamethoxazole leh 160 mg trimethoprim ni khatah vawi khat ei tur a ni.
- ✘ Ríl lam natna (Shigellosis) - Sulfamethoxazole 800 mg/trimethoprim 160 mg hi darkar 12 danah ni 5 chhung ei tur. 8-10 mg trimethoprim hi nitin ni 5 chhung IV-in a dose sem rualin darkar 6, 8 emaw 12 danah pek tur, a sang berah 60 mL tur a ni.
- ✘ Zin mite natna neih ðhin pum lam dik lo (Traveller's diarrhoea) - Sulfamethoxazole 800 mg/trimethoprim 160 mg ni 5 chhung darkar 12 danah.
- ✘ Zun kawng láwng (Urinary tract infectious disease) - Sulfamethoxazole 800 mg/trimethoprim 160 mg ni 10-14 chhung darkar 12 danah UTI hi damdawi dangin a hneh loh chuan trimethoprim hi 8-10 mg IV-in dose rual tak sema pek tur, darkar 6,8 emaw 12 danah pek tur a ni.

### Naupang tan

- ✘ Beng chhung natna (Acute otitis media) (thla 2 chin chung lam) - Streptococcus pneumoniae emaw Haemophilus influenza thlen a nih chuan Sulfamethoxazole 40 mg leh trimethoprim 8 mg hi dose rual taka semin darkar 12 danah ni 10 chhungin pek tur a ni.
- ✘ HIV infection - Pneumocystis pneumonia awmah chuan (thla 2 chung lamah) 75-100 mg sulfamethoxazole leh 15-20 mg trimethoprim IV-in ni 21 chhung dose rual taka semin ni 21 chhung pek tur a ni.
- ✘ Pneumocystis pneumonia, venna (thla hnih chin chung lamah) 750 mg sulfamethoxazole (a sang berah 1600 mg) leh 150 mg trimethoprim (a sang berah 320 mg) dose rual taka semin kar khatah vawi 3 pek tur a ni.
- ✘ Ríl lam natna (Shigellosis) - (thla 2 chin chung lam) sulfamethoxazole 40 mg leh trimethoprim 8 mg dose sem rualin darkar 12 danah ni 5 chhungin. Thla 2 chin chung lamahah 8-10 mg dose sem rualin trimethoprim IV-in darkar 6,8 emaw 12 danah ni 5 chhung pek tur a ni (IV hi a sang berah 60 mL tur a ni).

✱ Zun kawng lánng (Urinary Tract infectious disease) - (thla 2 chin chung lamah) Sulfamethoxazole 40 mg leh trimethoprim 8 mg hi darkar 12 danah ni 10 chhung (UTI hi damdawi dangin a hneh loh chuan), trimethoprim 8-10 mg IV-in dose rual taka sema pek tur darkar 6,8 emaw 12 danah.

**Side effects awm theite:**

A langsar zual deuhte chu thak, vual, luak chhuak, chaw ei tui lo leh a dangte. A nasat viau chuan hengte hi thlen thin - Allergy chi khat Erythema multiforme, vun natna chikhat Stevens-Johnson syndrome, thihna hial thlen thei vun natna Toxic epidermal necrolysis, kawthalo te, thin tha lo te, allergy vanga awm anaphylaxis leh a dangte a thlen thei bawk.

**Damdawi dang nen eipawlh a him em?**

Heng damdawite nen hian a ruala ei loh tur a ni -Dorfetilide, Gemifloxacin, Pyrimethamine, Methotrexate, Phenothiazines, Cyclosporin leh Zidovudine te nen.

**Nausen tan a him em?**

American Academy of Pediatrics-te zir chianna atang chuan Cotrimoxazole hi nuin a ei pawhin hnute tui hnektir a him a ni.

**Kal thalo leh dialysis a dose hman dan tur:**

CrCl 30 mL/min aia a san chuan dose adjust a ngai lo, CrCl 15-30 mL/min a nih chuan a dose 50% a tihhniam tur, CrCl 15mL/min aia a tlem chuan hman loh tawp tur a ni. Tin, dialysis ti mekte tan 50%-a dose tihhniam tawh kha dialysis tih zawh apiangin pek leh (supplement) tur a ni.

**Co-trimoxazole ei lo turte:**

Naupangah chuan thla 2 chin hnuai lam pek loh tur. Sulfamethoxazole Trimethoprim lo haw (allergic) tawh te, kal tha lo lutukah leh thin tha lo nei te tan hman loh tur a ni.

**Co-trimoxazole chungchanga hriat tur langsar zual deuhte:**

Co-trimoxazole hian ni zung natna a thlen theih avangin, he damdawi hman a nih lai chuan chhuah dawnah sunblock tha taka hman a pawimawh. Tin, luak chhuak leh vunah thak a thlen thei bawk. Hemi damdawi ei hnua damloin pum nuam lo, kawthalo, thawk lam harsatna te, vun natna te a neih chuan damlo enkawltute hrilh hriat vat tur a ni. Cotrimoxazole ei laiin tui in hnem tur a ni a, chu chuan kal a lungte awm tur a veng thei a ni.

## GENTAMICIN

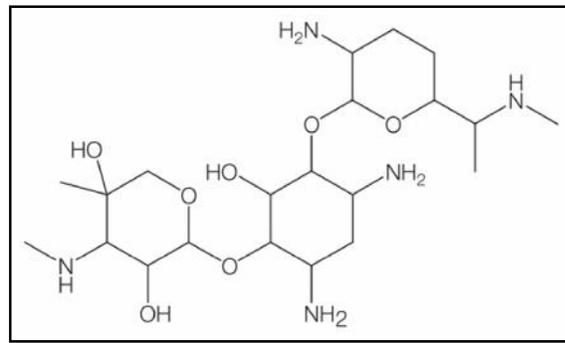

**Generic name:** Gentamicin

**Trade name:** Garamycin, Genoptic, Genoptic, Gentacidin, Gentafair, Gentak, Gentasol, etc.

**Eng chemical nge a nih?**

Purpurosamine, 2-deoxystreptomamine, Garosamine

**Eng angin nge kan hman thin?**

In chiu nan (IM emaw IV) leh vun pawnlanga hnawih atan.

**A hnathawh dan:**

Gentamicin hi aminoglycoside antibiotic a ni a, natna hrikin protein an siam tur titaupin natna hrik a tihlum thin a ni.

**Engzata ei tur nge?**

Puitling tan: Gentamicin dose pangngai hi ni khatah 3 mg/kg niin, darkar riat danah ni sarhi atanga ni sawm chung IV emaw IM-in pek thin a ni (he dose hian natna hrang hrang - Bacterial meningitis, Bacterial septicemia, ruh na, vun na, lung natna - Infective endocarditis, Peritonitis, pum na, thaw dawt na leh zun kawng na). Natna thihpui awlsam hoah chuan Gentamicin hi ni khatah 5 mg/kg-in wawi thum emaw wawi li pek tur a ni.

**Naupang tan:**

Naute (kum khat leh hnuai lam) tan Gentamicin dose hi ni khatah 7.5 mg/kg-in ni sarhi atanga ni sawm chung darkar riat danah pek tur a ni. Nausen (kar khat leh a hnuai lam) tan Gentamicin dose hi 5 mg/kg-in darkar sawmpahnih danah IV emaw IM-in ni sarhi atanga ni sawm chung pek tur a ni.

**Side effects awm theite:**

Vun thak, bawl, ni zung ngam loh ná (Photosensitization) te hi a side effect langsar zual an ni.

**Damdawi dang a halte:**

Gentamicin hi damdawi dang - Ethacrynic acid leh Furosemide nena rei tak hman chuan beng tan a pawl thei a. Tin, Gentamicin leh Cidofovir, Methoxyflurane emaw Vancomycin te hi rei tak hman kawp chuan kal (kidney) tan a hlauhawm thei bawk a ni. Gentamicin hi aminoglycoside antibiotics allergy nei tan hman miah loh tur a ni.

**Rai lai/nau pawm laiin ei a him em?**

Gentamicin hi rai laiin nu in a mamawh anih chuan, daktawr chawh chauhin a hmang tur ani a. Tin, nau pawm laiin mamawh dan a zirin hman a him bawk a ni.

**Kal tha lo leh dialysis-a dose hman dan tur:**

Kal tha lo tan Gentamicin hi dose pangngai (3 mg/kg) thoa pek tur a ni a, mahse creatinine clearance (CrCl) azirin a pek hun hi tihdanglam tur a ni. CrCl 60 aia tam tan darkar 24 danah pek tur a ni a, CrCl 40-60 inkar tan darkar 36 danah pek tur niin CrCl 20 aṅanga 40 inkar tan darkar 48 danah pek bawk tur a ni. Tin, damlo dialysis ti mekte tan Gentamicin hi dialysis tih zawh apiangah pek tur a ni a, puitling tan 1-1.7 mg/kg IV-a pek tur niin naupang tan 2mg/kg IV-a pek tur a ni.

## METRONIDAZOLE

**Trade name:** Flagyl, Flagyl ER, Flagyl I.V. RTU, Metrocream, Metrogel, Metrogel-Vaginal, Metro lotion, Noritate

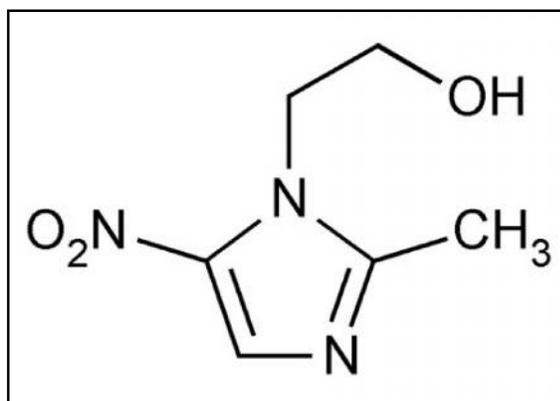

**Generic name:** Metronidazole

**Eng chemical nge a nih?**

-methyl-5-nitro-1H-imidazol-1-yl)ethanol

**Eng angin nge kan hmuh thin?**

Metronidazole hi a mum (tablet), lai hren (capsule), inchiu chi (injection), cream, lotion leh gel-in hmuh tur a awm.

**Eng atana hman nge?**

Metronidazole hi damdawi t̄angkai tak a ni a, bacteria leh protozoa avanga natna hrang hrang, thin leh taksa hmun danga tuihnang chi khat, pus tlingkhawm vanga v̄ung leh p̄un, santen, kawthalo, thluak, ruh leh hmeichhe serha bacteria vanga natna (infection), ulcer hrik (H.pylori) nei enkawl na atan te hman thin a ni. Tin, pumpui leh ruh chuktuah laia natna enkawl na atana hman damdawi dang puitu atan hman thin a ni a, natna thenkhat lak a t̄anga invenna (prophylaxis) atan pawh hman a ni bawk.

**Engtianga hman tur nge?**

Metronidazole hi natna azirin hman zat tur a danglam a. Puitling tan heng p̄un/v̄ung. Thluak infection, ruh natnahte hian darkar 6 dan zelah 7.5 mg/kg-in ni 7-10 chung ei tur a ni. A chiu chi (IV) dose hmasa ber (loading dose) hi 15 mg/kg-in darkar 1 chung pek tur a ni a, a dose hmasa ber pek a t̄anga darkar 6 hnuah a chhunzawmna dose (maintenance dose) hi 7.5 mg/kg-in darkar 6 dan zelah pek tur a ni. Thin p̄un/v̄ung leh santenah chuan 750 mg ni khatah vawi thum ni 5-10 chung ei tur a ni.

Serh a t̄anga bawhlawh chhuakah chuan zawi muanga in-release chi (extended release tablet) hi 750 mg hi ni khatah vawi khat ni sarih chung ei tur a ni a, a mum

pangngai hi 500 mg-in ni khatah vawi hnih ni 7 chhung ei tur a ni. A hnawih chi (gel) hi 35.7 mg-in ni khatah vawi khat emaw vawihnih emaw ni 5 chhung hman tur a ni.

Ulcer hrik neiah chuan Metronidazole 500 mg hi Clarithromycin 500 mg leh pumpuia acid insiam titem thei (PPI)-te nen a inkawpin ni khatah vawi hnih pek tur a ni, heng damdawi inkawp hmanga enkawl na hi triple therapy tih a ni. Quadruple therapy tih a awm leh a, hetah hi chuan Metronidazole 250 mg, Subsalicylate 525 mg, Tetracycline Hydrochloride 500 mg leh Ranitidine 150 mg te inkawp hi ni khatah vawi li ni 14 chhung ei tur a ni. Kawthalo ah chuan 500mg in nikhatah vawithum ei tur a ni. STD natna chi khat Trichomoniasis enkawl nan chuan a mum (Oral tablets) 250 mg hi ni khatah vawi 3 ni sarh chhung emaw, 2 g-in ni khatah vawi khat emaw, a dose rual taka semin (1 g- in) ni khatah vawi hnih ei tur a ni. Laihren 375 mg hi ni khatah vawi hnih emaw 2 g-in vawi khatah ei tur a ni. 500 mg a nih chuan ni khatah vawi hnih ni 7 chhung ei tur a ni. HIV vei hmeichhiaah 500 mg-in ni khatah vawi hnih pek tur a ni.

**Naupang tan:** Santen, thin vung/pun (abscess)-ah chuan 35-50 mg/kg hi ni khatah vawi 3 a dose rual taka semin pek tur a ni. Kawthaloah chuan 50 mg/kg hi a dose rual taka semin ni khatah vawi 3 pek tur a ni.

**A hnathawh dan:** Metronidazole hi nitroimidazole class ami a ni a. He damdawi hian bacteria-te DNA tichhiain bacteria-ten an lo thih phah ta thin a ni.

**Ei dan tur:** Metronidazole hi chaw ei hma darkar khat emaw, chaw ei kham atanga darkar hnih hnuah ei tur a ni a. He damdawi hi a phel emaw, a dip emawa pek loh tur a ni a, tin, thial sawm loh bawk tur a ni.

**Side effect awm theite:** Metronidazole hian pum nuam lo, ka tui lo, luak chhuak, luhai, lu na, kawthalo, kaih, thluak lama harsatna, mit natna leh a dangte a thlen thei.

**Damdawi dang a halte:** Metronidazole hi heng damdawite nen hian ei pawlh loh tur a ni - Amprinavir, Disulfiram, Mycophenolate, Tacrolimus, Busulfan, Warfarin, Tegafur.

### **Nu nau pai/hnute pe lai tan a him em?**

Metronidazole hi pregnancy category B ami a ni a, raipuar ei atan a tul a nih chuan a him thawkhat viau a, mahse trichomoniasis avanga enkawl mek tan nau pai tan tirh thla thum chhung chu ei loh tur a ni. He damdawi hian nau hnute pe lai tan eng ang chiahin nge nghawng a neih hriat chian a nih loh avangin fimkhur taka hman tur a ni.

Thin tha lo leh dialysis(hemodialysis)-a dose hman dan tur: Damlo thin tha lo nasa tawhah chuan zawi muanga in-release chi (extended release tablet) hi a tul tawpkhawkah lo chuan hman loh tur a ni. A chiu chi (IV), a mum in-release nghal chi (immediate release tablet) leh laihren ang chi a nih chuan a dose 50%-a tihhniam tur a ni.

Hemodialysis ti lai mek tan damdawi hi ei loh theih loh a nih chuan a dose hi a tul dan azirin pek belhchhah tur a ni.

Kan taksaa harsatna chi hrang hrang thlen thei leh chumi nghawng chu kan tarlan takte leh hetiang avanga taksaa lang chhuak (inflammatory response) awm thei tur hian thil pawimawh tak tak an awm a. Chutiang ho chu inflammatory mediators tia sawi thin a ni. Chung ho chu taksa peng hmun hrang hrangah an awm a, an awmna laia taksain hliam a tawk emaw, natna hrik an awm a nih vaih chuan kan thluakah an han zualko nghal vat a, kan thluak chuan a tul angin hma a lo la vat thin a ni.

Inflammatory mediators-te zingah chuan pawimawh em em pakhat a awm a, chu chu PROSTAGLANDINS a ni. Prostaglandins chu chi hrang hrang awmin, hnathawh chi hrang hrang an nei theuh a. Mediators dang chu Histamines, Leukotrienes, Kinins, 5-HT leh a dangte a ni. Prostaglandins bik hi na chhawkna ten hna an thawhna ber a ni a, nakinah kan sawi zau deuh ang.

### **Inflammation-in (Hliam leh Vúng) a thlente:**

1. Kan taksa tina thei natna hrik awmte hmunkhata daha tihchhiat turin a buatsaih a, chutiang hliamte chu an dam leh vat theihna turin kawng a hawng.
2. Kan han tarlan tak inflammatory mediators chi hrang hrangte hian hliam awmna hmunah khan thil tih takngai tak

mai an nei a, chu chu hliam awmna laia thisen zam awm ho an tizau (vasodilation) thin. Thisen dawt a lo zau tak avang hian hliam awmna laiah khan thisen an lo luang/tling hnem ta a ni. Thisen tlingkhawm lo tam bik avang chuan taksa raldo khawl pawimawh tak White Blood Cells (WBC) an lo awm tam phah a, chu chuan chulai vela natna hrik awmte chu chak zawka an thih theihna turin nasa takin a pui a, hei mai bakah hian thisen a tlingkhawm tam chuan oxygen leh chaw tha a lo tam phah a, timur hliam leh thi tawhte a thara thlaka tihdam a nih vat theihna turin a pui baw. Hetia thi tlingkhawm tam bik a lo nih avang hian vung leh hliam lai chu mita han en mai pawhin a lo sen zual ta bik thin a, hei hi medical term chuan Erythema tih a ni.

3. Thisenah hian timur hliamte damna atana tangkai tak antibody proteins a awm a, heng proteins-te hian dan pangngai chuan thisen dawt hi an paltlang thei lo thin a. Mahse hliam awmna lai vela thizen zamte hi mediators-te khan paltlang awlsam turin an lo siam a, proteins-te chuan hliam awmna lai chu an thlen ve theih phah thin. Proteins-te chuan tui an kalpui tel thin a, hei vang hian hliam laiah chuan tui tling a lo tam a, vung (swelling) a lo awm phah thin a ni.

4. Kan tarlan tak Prostaglandins (Kinins pawh telin) chuan thluakah na hriat theihna turin hna a lo thawk baw.

5. Mediators-te hian kan tarlan tak bakah hian an hnathawh pawimawh tak chu, taksa raldo khawl WBC (a bikin neutrophils leh monocytes) te an hipkhawm baw thin a, hei hian natna hrik leh timur thi tawhte an dah bo thin.

6. Prostaglandin leh mediator thenkhatte hian thluaka taksa lumna (temperature) enkawltu chu taksa lumna tisang turin an pui baw a, hei vang hian khawsik (fever) kan lo neih phah thin a ni. (Mihring taksa lumna pangngai chu 37 degree Celcius/ 98.6 degree Farenheit a ni.)

### **Na chhawknâ hnathawh**

Natna hrik leh chhan dang avanga hliam leh ná hnathawh leh, a lo awm theih dan te, a awmna atanga tangkai tak takte kan tarlang tawh a. Prostaglandins hnathawh chi hrang hrang kan hre tawh baw a. An tangkaina zawnah chuan an tangkai hle mai; mahses a chin tâwk hi a awm zel a, kan tawrh theih loh chinah chuan an hnathawh tihnêp a, vung, ná leh khawsik an thlen te kan lak kian a ngai thin. NA CHHAWKNA (NSAIDS)-te hi chumi atan chuan an tangkai em em a ni.

Prostaglandin insiam chhuahna atana chemical tangkai tak chu Arachidonic Acid a ni a. Arachidonic Acid atang chuan kawng hnihin a hmaa kan sawi tawh inflammatory mediators a insiam chhuak thin a. Chu kawng pahni zinga pakhat zawk chu Cyclooxygenase Pathway (COX-Pathway) a ni a, pakhat leh chu Lipoxigenase pathway a ni. Lipoxigenase pathway hi inflammatory mediator chi khat Leukotrienes insiam chhuahna a ni a, kan sawi thui vak lo ang. Prostaglandin insiam chhuahna kalkawng zawk Cyclooxygenase pathway zawk hi kan sawi zauh hlek tur chu a ni. He kalkawng pawh hi chi hnih a awm leh a, COX-1 leh COX-2 pathway a ni.

Na chhawknâ Paracetamol, Aspirin, Diclofenac leh a dangte hian an hnathawh ber chu Prostaglandin insiam chhuahna

kalkawng ber, CYCLOOXYGENASE PATHWAY (COX-1 leh COX-2) hi an dang thin a. Motor kawngpui lun tak, leimin nasa takin a block avanga motor eng chi mah a kal tlang thei lo ang chiah hian ná, vung leh khawsik insiamna atana tangkai em em Prostaglandin chu a insiam thei ta lo a. Hei vang hian NA CHHAWKNA an lo ni ta a ni.

COX-1 kal tlanga Prostaglandin insiam ho hian taksaah hna hrang hrang an thawk a, pumpuia acid tam lutuk tur ven te, a tul huna thisen zam tih-tê (vasoconstriction) leh thisen khar (blood clotting) siam te leh kal (kidney)-ah hnathawh pawimawh tak a nei baw a. COX-2 kawng bik zawhte hi na siamtu chu a ni ber a, na chhawknâ tam tak hian heng kawngpui pahnihte hi an dan ve ve avangin COX-1 kal tlanga prostaglandin insiam ho kha hna a thawhtir thei ta lo a, hei vang hian harsatna chi hrang hrang a thlenin adverse effect a lo awm phah ta thin a ni.

### **Eng huna ei tur nge?**

Kan sawi tawh angin Prostaglandin hi chi hrang hrang a awm a, hnathawh pawh chi hrang hrang a nei baw a. Chutiang zinga pakhat chu COX-1 kalkawng hmanga insiam PGE2 hi a ni a. He prostaglandin hian kan pumpuia acid insiam nasa lutuk a veng thin a, chu mai ni lovin pumpui acid laka vengtu leh pawlh daltu mucin inpek chhuahnaa hna tangkai tak a thawk baw a. Na chhawknâ kan tih tam tak hian a PGE2 insiam tur a dan vek avangin pumpuia acid inpe chhuak kha a tam phah a, tin, a vengtu pawh a tlem baw a. Hei vang hian na chhawknain pum nuamlo a siam thei kan lo tih phah ta a ni.

Hemi a nih avang hian na chhawkna reng reng hi pum ruaka ei miah loh tur a ni a, chaw eikham veleh emaw, chaw ei laiin ei tur a ni. Chumi kan thei lo a, pum ruaka ei ngei kan ngai a nih si chuan tui tam tak in tel tur a ni. Na chhawkna hi hman reng tur a ni lem lo a, (stroke venna atan Aspirin hun rei zawk chhung hman a nih ngawt loh chuan) ná a lo chhuah hunah chauh hman tura chawh (SOS) a ni òhin.

### Side effects

Na chhawknate hnathawh òngkai tak COX-1, COX-2 kawngpui dan a lo nih avang hian prostaglandin tam tak hnathawh a buai phah òhin. Hei vang hian taksaah side effect chi hrang hrang a awm phah thei a. Pumpui, kal, beng, mit, chuap, vun, thin, lung, hmui leh kachhung pán leh harsatna chi hrang hrang a thlen thei.

### NSAIDS chi hrang hrangte:

PARACETAMOL,  
ASPIRIN  
PHENYLBUTAZONE & OXYPHENBU-  
TAZONE  
DICLOFENAC SODIUM  
ACECLOFENAC  
MELOXICAM  
ETODOLAC  
IBUPROFEN  
FENOPROFEN  
FLURBIPROFEN  
PIROXICAM  
TENOXICAM  
INDOMETHACIN  
KETOROLAC  
NABUMETONE  
NAPROXEN  
SULINDAC  
NIMESULIDE  
SELECTIVE COX-2 INHIBITORS

CELECOXIB  
ROFECOXIB  
VALDECOXIB  
ETOROCOXIB

### Na chhawkna hman dan tur tlanglawn

- ▶ Na satliah (mild/moderate pain) - Paracetamol, Ibuprofen (dose hniamin, eg. 200 mg)
- ▶ Inzai zawha ná ang chi (post op. or short lasting pain) - Ketorolac, diclofenac.
- ▶ Ruh ná (Musculoskeletal pain) - Paracetamol, Ibuprofen, Naproxen, Ketoprofen, Diclofenac.
- ▶ Arthritis leh Gout - Naproxen, Piroxicam, Indomethacin, Aspirin (dose sangin)
- ▶ NSAIDS allergy neiteah - Paracetamol & COX-2 chauh dang chi. (.coxibs)
- ▶ Naupang na chhawkna atan - Paracetamol, Ibuprofen & Naproxen
- ▶ Raipuar tan - Paracetamol a him ber.
- ▶ Pum òha lo neiah - Paracetamol leh OX-2 chauha thawk hman tur. (.coxibs)

Awle, NSAIDS/na chhawkna hnathawh leh nghawng òha lo a neih theih tlangpui, hriat thiam awlsam tur chin chu kan hre ta a. NSAIDS reng reng hi doctor lehkha/chawh kher ngai loa damdawi lei mai theih a ni mah se, fimkhur taka hman loh chuan nghawng òha lo tak a nei thei a, tin, rei tak ei tur a ni lem lo baw. Hei bakah hian damdawi òhenkhat nen NSAIDS kan ei pawlh hian nghawng òha lo nasa tak a thlen thei baw. Damdawi i lei dawn leh ei dawnin mithiam rawn hmasa òhin la, fimkhur taka damdawi hman hi i mawhphurhna a ni.

## TIGECYCLINE

**Trade name:** Bactigelin, Protigi, Tigaphar, Tigez, Tize B, Trectabin, etc.

**Generic name:** Tigecycline

**Eng chemical nge a nih?**

(4S,4aS,5aR,12aR)-[[2-(tert-butylamino)acetyl]amino]-4,7-bis(dimethylamino)-1,10,11,12a-tetrahydroxy-3,12-dioxo-4a,5,5a,6-tetrahydro-4H-tetracene-2-carboxamide

**Eng angin nge kan hmuh thin?**

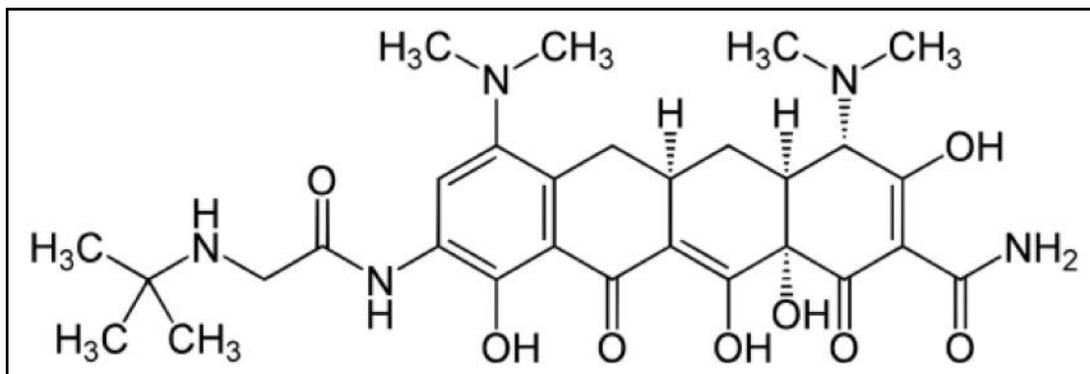

Tigecycline hi inchiu (injection) anga siam a ni.

**Eng atana hman nge?**

Tigecycline hi antibiotic a ni a. He damdawi hi bacteria natna hrikin a thlen natna - pneumonia, intra-abdominal infections leh skin infections enkawl nana hman thin a ni.

**Engtingge hna a thawh?**

Tigecycline hi bacteria-a 30S ribosomes-ah invuahin amino acid inbelhbawm tur a veng a, hei hian protein insiam tur dang (block)-in bacteria thang thei lovin a siam a ni. Tigecycline hian bacteria chi hnih - S.pneumonia leh L.pneumophila a that thei bawk a ni.

**Engzata ei tur nge?**

Puitling tan: Tigecycline hi a hmanna azirin a ei dan tur a inang lo va. Pneumonia-ah chuan 100 mg (IV)-in ni khatah vawikhat inchiu hnuah 50 mg (IV)-in darkar 12 danah ni 7-14 inchiu chhonzawm tur a ni. Vun natna leh pum pán (abdominal infection)-ah chuan 50 mg (IV)-in darkar 12 danah ni 5-14 chhung inchiu tur a ni.

Naupang tan: Tigecycline hi naupangah kum 8 aṅanga kum 11 inkarah chuan 1.2 mg/kg (IV)-in darkar 12 danah chiu ṭhin tur a ni. Naupang kum 12 aṅanga kum 17 inkarah chuan 50 mg (IV)-in darkar 12 danah chiu ṭhin tur a ni.

Upa lamte tan: Tigecycline hi upa lamte tana ei zat tur hi puitling dose pangngai anga pek mai tur a ni a, tihdanglam kher a ngai lo.

**Side effects awm thei te:**

Kawṭhalo, pum ná, luak chhuak, luak leh lu ná te hi a side effect langsar zual a ni.

**Damdawi dang nen eipawlh a him em?**

Tigecycline hi damdawi dang tam tak nen a ruala taksaa lak luh loh tur a awm a, a lar zual ṭhenkhatte chu - Warfarin, Astreonam, Imipenem, Metronidazole, Ceftriaxone, Vancomycin, Doripenem, Ethinyl estradiol, Norepinephrine, Piperacilin te an ni.

**Rai lai/nau pawm lai tan ei a him em?**

Tigecycline hi laihruih leh hnute tuih a kal tlang theih avangin naupai tan leh naute hnute tui pe lai tan a hlauhawm theih avangin a theih hram chuan hman loh a him ber a ni.

**Kal ṭha lo leh dialysis-a dose hman dan tur:**

Tigecycline dose hi kal ṭhat lohna neite tan siam danglam (dose adjustment) ngai lovin kal function ṭha pangngaia hman ang thova hman mai tur a ni a, hetiang vek hian dialysis ti lai dam lo tan pawh dose pangngai a hman theih bawk.

He zawhna hi chhan a har angreng khawp mai. A chhan chu generic drug siamtu ʈhenkhatte hian an damdawi siam hi brand name an pek ve tho ʈhin vang a ni. Kan hriat tur chu damdawi brand name nei zawng zawng hi a siam chhuaktu siam (innovator's product) a ni vek kher lo tih hi a ni. Entirnan, Paracetamol chu a siam chhuaktu chu McNeil Consumer Healthcare (Johnson & Johnson hnuai mi) a ni a. A siam chhuaktuina brand name a pek chu Tylenol tih a ni. Tichuan Tylenol chu innovator's brand name a ni a, Tylenol tih chu Paracetamol tihna a ni. Tunah erawh chuan Paracetamol patent hi a tawp tawh avangin company hrang hrangin a generic version an siam tawh a. Heng generic version-te hian brand name chu nei ve bawk mah se, a man hi a tlawm tawh hle a ni. Chuvangin innovator's brand leh generic hriat hran awlsamna ber pakhat chu a man (price)-ah a ni.

### **Innovator's Branded Drugs ʈangkaina:**

Branded drugs-te leh generic drugs-te danglamna kan sawi a. Branded drugs-te man a to nasatzia kan hre tawh bawk. Amaherawhchu, branded drugs-te hi a la awm zel dawn a, a awm a ʈulna pawh tam tak a awm ve bawk. Patent leh exclusivity kan tih hi damdawi hmu chhuaktu hnena pek a nih loh chuan damdawi thar leh ʈha zawk hmuh chhuahna kawngah research a ʈhuanawp

dawn a. Natna tam tak, a tihdamna tur kan la neih lohte enkawlna tur damdawi thar hmu chhuak tur pawhin company leh a thawktuten thâ an seng kher lo vang. Chuvangin, rim taka thawktute tana malsawmna a nih miau avangin leh hna thawktuten an thawhrim man an tel hi thil tha tak a ni. Amaherawhchu, patented rights-te hman sualna tur erawh chu ven a t̄ul hle thung a ni.

### **Generic drugs-te kan mamawhna**

Branded drugs-te hi kan mamawhin leh an pawimawh hle rualin generic drugs-te hi rethei zawk leh damlo harsa zawkte tan chuan malsawmna a ni ve thung. Damdawi hmu chhuaktu leh siam chhuaktu company-ten neitu nihna an neih an hmang sual tur leh damdawi man sang lutuk tur venna atan te bakah, mi harsa zawktena kan ban phaka damdawi a awm ve theihna chu generic drugs-te hi an ni.

### **Case Study: Anticancer drug - Nexavar**

Sorafenib Tosylate (Generic name) hi kal (kidney) leh thin (liver) cancer enkawlna ber atana hman (1st line drug) damdawi a ni a. He damdawi hi Germany company lian Bayer Corporation-ina an siam chhuah niin India ramah pawh neitu nihna (patented rights) kum 2021 thleng atana pek an ni. He damdawi hi Bayer hian Nexavar (Brand name) tiin a zuar chhuak a. He damdawi hmanga Cancer veite enkawlna man hi thla khatah Rs. 2,80,428 (*Pharmabiz, 2014*) lawih a ni. Dan ang chuan he damdawi

hi kum 2021 hma chu Nexavar tih hmang chauh va zawrh chhuah theih a ni a, mi dangin an siam ve thei lo.

He damdawi hi Indian Patent Office (IPO)-in neitu nihna Bayer hnenah lo pe tawh mah se, mipui tana tha zawk nia hriat a nih avang leh Indian Patent Act, 1970 Section 84-in a phal angin, man tlawm zawk (generic version)-a siam phalna, Compulsory Licence (CL) chu Natco Pharma, Hyderabad hnenah kum 2012 March thla khan a pe a. Tichuan he Sorafenib Tosylate generic drug, Natco Pharma-ina a siam hmanga cancer veite enkawl an nih chuan thla khatah ₹ 8,880 aia tam lo an seng dawn chauh a ni. Hetih rual erawh chuan Bayer-te hi IPO-in patent a lo pek tawh a nih avang erawh chuan Natco Pharma-te hian an hralh chhuah at̄angin 6% royalty chu thla thum danah Bayer hnena pe tura tih an ni. Tin, Natco hian cancer vei, rethei zual kum tin mi 600 hnenah he damdawi hi a thlawna pe tura tih an ni bawh.

IPO thutluknaah hian Bayer chu lungawi lovin Intellectual Property Appellate Board (IPAB), Chennai hnenah May ni 4, 2012 khan an zualko va (*Economic Times, 2012*). Amaherawhchu IPAB pawh chuan Natco Pharma hnena phalna an pek hi March, 2013 khan an rawn nemngghet ta zawk a. Bayer-te hian an lungawilohna hi Bombay High Court-ah thlen leh mah se, Bombay High Court pawh chuan July 2014 khan IPO-ina Compulsory Licence an pekna hi a rawn nemngghet leh ta tho a ni (*Pharmabiz, 2014*).

## THE NARCOTIC DRUGS AND PSYCHOTROPIC SUBSTANCES ACT 1985

**T**he Narcotic Drugs and Psychotropic Substances Act 1985 (NDPS Act) hi kum 1985 aṅanga hman ṅan niin, 'narcotic drugs' leh 'psychotropic substances' te khap (prohibition), khuahkhirh (control) leh dan mumal taka kaihhruaina (regulation) siam a ni. Hun inher danglam zelah mamawh dan azirin ṅum thum (1988, 2001 leh 2014-ah) siam ṅhat (amend) tawh a ni.

He Act-in Narcotic drugs nia a sawite chu coca leaf, cannabis, opium, poppy straw te bakah he'ng hmanga license tel loa ruih theih thil siam chhuahte an ni a. He Act hnuaiah hian damdawi ruihtheih thil hman leh siam chhuah bakah hralh a phal lohte chu a list siam a ni bawk. He dan hmang hian he'ng ruihtheihthil kan sawi takte hi kaw/nei (possession), ruih nana hman/ei (consumption) leh hralh (sale) te hrem leh man theih a ni.

### Engte nge man/hrem theih?

A hmaa kan sawi tak ang khan damdawi hman sual laka dan mumal tak hmangin NDPS Act hnuaiah hian dan bawhchhetute chu man leh hrem theih a ni a. He'ng ruihtheihthilte hi a ruitu mai bakah ruih theiha siam chhuaktu te, a hralhtu leh a dahṅhatu (warehousing) leh a siamna leh semdarhna leh ṅul danga pawisa thawhtu (financing)

bakah, heng ruihtheihthil thenkhat (eg. ganja) te license tel loa ruih nana chìn (cultivate) thleng a khap bakah a hrem thei baw a ni. A hremna nat zawng hi drug quantity azirin a nain a na lo thei a. Quantity thuma then niin chungte chu small quantity, less than commercial leh commercial-ah te then a ni. A drug azirin category hrang hranga awm zat hi a danglam ve baw. Hetia category hrang hrang then hi sorkar mawhphurhna a ni a, kan hriat tlanglawn deuhthe hmangin entirna lo pe ila:

- 1. Codeine:** small quantity - 10 grams; commercial quantity - 1 kg
- 2. Ganja:** small quantity - 1 kg; commercial quantity - 20 kg
- 3. Heroin:** small quantity- 5 grams; commercial quantity - 250 grams
- 4. Morphine:** small quantity - 5 grams; commercial quantity - 250 grams

Small quantity leh commercial quantity inkar amite chu less than commercial-ah dah an ni a. Ruihtheihthil mante chu a quantity an enfel hnuah a tam dan azirin hremna pek theih pawh a nain a na lo thei a, tin, a damdawi azirin hremna hi a danglam ve zel baw. Dan hmanga hremna hi thla 6 chung lungin tàn bakah cheng sing khat thleng chawitir theih aṅanga kum 20 thleng lungin tàn leh cheng nuai chuang thlenga chawitir theih a ni. Entirnan, kan hriat tlanglawnte zing ami opium leh cannabis-ahthe hian a hrem theihna chu hetiang hi a ni:

**Small quantity:** Hrehawm taka lungin tàn bakah pawisa fai cheng sing khat thleng a chawin a chawin lo thei (Up to 1 year rigorous imprisonment with/without fine up to ₹ 10,000).

**Less than commercial:** Hrehawm taka lungin tàn bakah pawisa fai cheng nuai khat thleng chawin emaw chawin lovin (Up to 10 years rigorous imprisonment with/without fine up to ₹ 1 lakh).

**Commercial quantity:** Hrehawm taka lungin tàn bakah pawisa fai cheng nuai khat aṅanga nuai hnih inkar chawin (Rigorous imprisonment between 10-20 years and fine between ₹ 1-2 lakh).

Tin, opium, poppy, coca/cannabis plant kan tithe hi license tel loa chìn (cultivation) bakah siam chhuah emaw, hralh, sem darh, lei leh dahthat thlengin he dan hian a khap tlat a. Miin license a neih a, license-in a phal baka a hmang bawrhbang a nih chuan kum 10 aṅanga kum 20 inkar hrehawm taka lungin tàn (rigorous imprisonment) bakah ₹ 1-2 lakh pawisa chawitir theih a ni. Heng damdawi hman phal lohte thawn chhuah leh lak luhte (export and import) hi khap a ni baw a, dan bawhchhetu chu kum 1 aṅanga kum 20 inkar lungin tàn tir theih a nih bakah ₹ 10,000 - ₹ 2 lakh pawisa chawitir theih a ni baw a ni. Court-in ṭul a tih chuan a mi mante chu medical treatment la turin thu a pe thei baw a ni.

NDPS Act chapter IV-ah hian he dan hnuaia damdawi hman a khapte leh a hremnate tarlan a ni a. Chapter V-ah hian a man theih dan leh eng anga bawhzui tur nge a nih tih a tarlang baw. Tin, sec 36 NDPS Act hnuaiah sorkar chuan a ṭul leh pawimawh a tihnaah Special Court a din thei a. Special court a rorel tur hian sorkarin judge pakhat a ruat ṭhin a ni. NDPS Act hnuaia dan bawhchhetute hrema atana kum thum leh a aia tam chin lungin tàn theihna te chu he Special Court chiah hian ro a relsak thei a ni. Complain lo lutte chu uluk taka bawhzuia zir

chianna (investigation)-te a tih zawh hnuah ṭul a tih angin hremna a pe ṭhin a ni. Tin, first class Magistrate emaw, sorkarin thuneihna a pek bik Second Class Magistrate-in he Act hnuaiia phal lohte miin a ti nia a rinhlelh chuan search warrant pein, chhun emaw zanah pawh, khawi hmunah pawh a chhuitirin a mantir thei a ni. Tin, warrant tel loin police constable aia rank sang officer-in rinhlelh a neih chuan a chhuiin a man thei bawk a ni. A man theih dan hi kawng tam tak sawi tur a awm ang a, kan hriat tlanglawn turah hian duhtawk mai ila.

NDPS Act hi damdawi ruih theih hman dik loh leh hman sual theih laka

mipuite venna atana dan siam a ni ber a. He dan hmang hian narcotic drug-te mumal taka khap leh a ṭul dan azira license hmanga siam theihna leh hman theihna dan siam a ni a. Amaherawhchu tunlai khawvel inthlak danglam zelah khawvel mamawh a puhruk zawh lohna kawngte pawh a awm ve leh zel a. Heng narcotic drugs and psychotropic substances kan tihte hi damdawi thilah mamawhna a awm ve avangin khap bur hi thil theih loh a nihna lai awm a. Chuvangin NDPS Act hnuaiia hian a ṭul dan azira hman leh siam chhuah theihna license pek a, a dik loa hmangtute man leh hremna pekte hi mumal taka siam a ni.
